ATEEB SHAIKH

Software Engineer | Data Engineering & Full Stack Development

Pune, Maharashtra, India | +91-9130206680 | shaikhateeb23@gmail.com | linkedin.com/in/ateeb-shaikh
github.com/Ateebshaikh23 | Portfolio: ateeb-portfolio-mu.vercel.app

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building full-stack web applications and data pipelines. Works across React, Next.js, TypeScript, Node.js, and PostgreSQL, as well as Python and SQL ETL/ELT workflows, medallion-architecture (Bronze/Silver/Gold) data platforms, and Power BI analytics. Hands-on project experience with Databricks and Microsoft Fabric. Uses AI-assisted development tools to accelerate delivery and improve code quality.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript
Data Engineering: ETL/ELT, Medallion Architecture, Data Modeling (Star/Galaxy Schema), Data Quality & Validation, Apache Airflow, PySpark, Polars, Fivetran, MinIO
Data Platforms: Databricks (PySpark, Delta Lake, Workflows/Jobs, Dashboards, Genie); Microsoft Fabric (Lakehouse, OneLake, Notebooks, Data Pipelines, Dataflows Gen2)
BI & Analytics: Power BI (DAX, Data Modeling), SQL Reporting
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap
Backend & APIs: Node.js, Express.js, NestJS, Flask, REST APIs, Zod, Postman, Insomnia
Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma ORM, DBeaver
Testing & DevOps: Jest, Playwright, Git, GitHub, Docker, Docker Compose, Vercel, Railway
AI-Assisted Development: Claude, ChatGPT, Gemini, Codex, Grok

PROFESSIONAL EXPERIENCE

Grafikaly Business Communications Pvt. Ltd. Remote, Surrey, BC, Canada
Software Engineer Jun 2026 – Present

- Develop and maintain full-stack web applications, backend services, and PostgreSQL databases.
- Design and automate ETL/ELT workflows and data-processing pipelines to improve reporting efficiency.
- Integrate third-party APIs and optimize database performance; test and document REST APIs with Postman and Insomnia and manage databases with DBeaver.
- Use AI coding assistants (Claude, ChatGPT, Codex) to accelerate development and code review.

Web Developer Intern Jun 2024 – May 2026

- Built and deployed a full-stack news platform for a New Zealand client, supporting 500+ daily users.
- Implemented Zod-based validation across forms and APIs, improving data quality.
- Containerized environments with Docker and established testing workflows using Jest and Playwright.
- Developed Power BI dashboards and SQL reporting solutions for business analysis.
- Used Fivetran for automated data ingestion pipelines and MinIO for object storage in data workflows.

Diginowa | ***Frontend Developer Intern*** May 2023 – Apr 2024

- Developed responsive UI components using HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS; converted Figma designs into production-ready web interfaces.

SELECTED PROJECTS

NZ Sports Data Platform | Python, PostgreSQL, MinIO, Docker Compose, Power BI

- Designed a medallion-architecture (Bronze/Silver/Gold) data platform ingesting CSV, Excel, JSON/API, and PDF sources from MinIO into PostgreSQL; built Silver-layer cleaning and data-quality validation in Python and Polars, with SHA-256 checksum deduplication in Bronze.
- Designed API discovery processes and a source-tracking architecture covering 61 APIs across 24 categories; used Postman for API testing and Fivetran for data sync.
- Built a Gold layer with conformed dimensions, fact tables, and KPI calculations (YoY growth, CAGR); developing a Power BI dashboard on top of it (in progress).

Databricks Medallion Analytics Dashboards | Databricks, PySpark, Delta Lake, SQL, Python

- Built dashboards from multiple CSV files using Bronze/Silver/Gold layers; cleaned and transformed data with PySpark, Python, and SQL, storing curated layers as Delta Lake tables.
- Explored Databricks Workflows/Jobs for pipeline scheduling and Genie for data exploration and analysis assistance.

Microsoft Fabric Lakehouse Analytics (In Progress) | Microsoft Fabric, OneLake, Power BI

- Building a Lakehouse analytics solution on OneLake using Fabric Notebooks, Data Pipelines, and Dataflows Gen2, with Power BI dashboards and reports.
- **Retail Sales Dashboard** – Built Power BI dashboards with Python-based data preparation and PostgreSQL integration.
- **Portfolio Platform** – Full-stack portfolio app built with React, Tailwind CSS, Material UI, Prisma ORM, and PostgreSQL; deployed on Vercel: ateeb-portfolio-mu.vercel.app

EDUCATION & CERTIFICATIONS

BBA (Computer Applications), AKI's Poona College of Arts, Science & Commerce 2023 – 2026
Master of Computer Applications (MCA), IGNOU, Pune Admission in Progress – 2026 Pursuing
Diploma in Computer Applications (NIELIT) – Website Building Using AI | Canva Design (AI)
